New and Latest Concessions!

Sixth Season Over Same Territory!

A Good Clean Show for Young & Old!

W. BADDELEY, Manager United Canadian Shows, Box 556, VANCOUVER, B. C.

Baseball Players Barred

At the meeting on Friday night of the executive of the Intermediate Ball League, protests were entered against the using of certain players on four of the ball teams in the league. After the matter had been discussed at some length by the representatives of the clubs interested, it was decided to ask the Enx team to retire Ken Ball; the Winterburn club to retire Gladue; the Grove club to retire Herman Loeblich; and the Duffield team two men, Ibsen and Landsman.

United Farmers' Picnic.

Arrangements are now under way for the holding of the big U. F. A. picnic of Stony Plain Constituency Ass'n. This includes all the Locals in this Constituency. At the meeting of this association a short time ago a committee composed of H. J. McDonald, G. Erickson and C. Pitzler, was appointed, to arrange for the affair. It is the intention to hold the picnic at Edmonton Beach the latter part of this month.

Our member in the Legislature Mr. Donald MacLeod, will be present. With him will be Hon. Geo. Hoadley, Minister of Agriculture; and probably Pres Garland, of the U. F. A.; and Mr. Gardiner, member of the House of Commons.

Boxing Exhibition.

Lovers of the fistic art will no doubt, turn out in large numbers to see the boxing bouts which are billed for the Onoway hall tomorrow (Fri) night, July 10th. Two well known figures in the pugilistic world will don the gloves for a six round go. This bout should prove very interesting, as each of the men, Larocque and Gardiner, have been in the game for some time, and will, no doubt, give a good account of themselves. A well known sportsman from Edmonton is expected to referee this bout, as well as the two preliminaries, when local mitt artists will poke each other for glory and prizes.

A dance will follow the entertainment.

Edmonton Beach.

Wednesday seen another record crowd at this popular summer resort, where the chief attraction was the sports of the children from the rural schools. Some 30 events were on the bill. These were well contested, and were very interesting to the large crowd of spectators. The entrants in the homemade Beach costume competition presented a charming picture, and it kept the judges busy giving their final decision.

The rainy season has had an effect on the Beach lake, the water having risen two feet over the level of the past few seasons; and, with the rise in the lake, the number of fish seem to be increasing.

GET IT AT

HARDWICK'S

FOR THE HOLIDAYS.

"IT COSTS LESS!"

Men's Dress Sox 38c. & 50c.; worth a lot more.

Ties 39c. and 50c. Very Special.

Mass Pessimism

Returning home for a brief vacation, United States Ambassador Dawes at London, England, describes the present economic situation as one in which the peoples of the world are suffering from "mass pessimism."

What Ambassador Dawes says is unquestionably true, but before the prevailing pessimism became general the world was suffering from a condition which as it became intensified resulted in the "mass pessimism" which he deplores and which now has a crippling effect on all efforts to improve conditions.

Without going too far afield, we find that conditions in Western Canada this year are such as to induce pessimism. Thousands of farmers and their families are in dire straits because of widespread drought conditions resulting not only in crop failures but in lack of water and pasturing for live stock. No crop in sight for 1931 and added expense in caring for livestock, following as they do upon a short crop or none at all last year, and prices below the cost of producing what may have been produced, have created an acute, a desperate situation for a large section of our population. And the resultant stagnation in agriculture, with an absolute cancellation of purchasing power, has reacted adversely upon all business with the result that unemployment has become intensified in all urban centres.

Such is the situation and it would be the height of folly to attempt to deny it or seek to minimize or ignore it. Such a situation breeds pessimism, first among those who, even when everything is bright and encouraging, always look upon the dark side of any picture, those who seem to be natural born croakers and fault-finders. But just as it only requires right conditions for bacteria to multiply and spread, or for some malignant disease to develop into an epidemic, so these habitual pessimists infect others not usually so inclined but who because of their difficulties and losses are susceptible. Mass pessimism is the result.

Yet it is uncalled for. It is utterly futile. It accomplishes nothing but to make the individual more downhearted and miserable than he, or she would otherwise be, and to frighten and discourage others who might otherwise continue on the even tenor of their way, helpful factors in the encouragement of many and in the dissipation of the prevailing gloom.

In time of war there is no one thing which gives a wise general more concern than the maintenance of the morale of the rank and file of his army. Let morale be broken and lost and the best drilled and equipped army in the world becomes a mob. Instead of being a threat to the enemy, it becomes a menace to itself. And the most victorious of armies has to retreat sometimes. It meets reverses, temporary though they may be. It is then that morale must be maintained, when it requires to be pitched higher than ever in the confident hope and expectation of the crowning victory to come. It is only so that victory will come.

There is just as truly a morale in economics, and it is in times of depression, crop failures, falling markets, unemployment, that it must be maintained, not only by the generals and captains but by the rank and file if the nation is not to suffer irretrievable loss and possibly go down to defeat.

It is the duty of people in their own best interests to curb their pessimism. We do not say they should minimize present difficulties, because they should be frankly faced and efforts made to overcome them, but they should not be magnified. Nor should difficulties and troubles be imagined where they do not exist.

We do not believe people can pull themselves up by their boot straps, but we do believe they can refrain from stepping into quagmires. They can keep their feet on firm ground and not suddenly slip into a slough of despond. And now is the time to do it.

What is this mass psychology anyway? It is simply a lack of individuality on the part of the many. A man stands on a street corner gazing up at nothing at all and soon he is surrounded by a crowd craning their necks looking at exactly the same thing. A man says times are hard and the one to whom he says it, even though he be better off than ever before, dolefully shakes his head, buttons up his pockets, repeats the same story, and thus helps to make times hard when he would be the gainer by adopting exactly the opposite course and thus help to improve conditions.

Be an individual. Be yourself. Stand out from and away from the mass. Think and act with hope in your heart and an eye to the future. By so doing you will not be making conditions harder, you will not be discouraging others; on the contrary, you will find your own burden lightened, your own outlook improved, your courage renewed.

Shopping Psychology

They are telling the true story at the Hotel Victoria, New York, of the enterprising 'Seventh Ave. shoe merchant, who, after failing to dispose of a bargain batch of shoes at \$3.50 a pair, ran a dollar-day sale offering out at \$6 a pair, with an extra pair thrown in for a dollar more, closing out his entire stock in less than three hours!

First Little Girl—What's etiquette, Lily?
Second Ditto: Oh, that's the noise you mustn't swallow your tea with when there's company.

Demand For Vegetables

The increasing demand for vegetables in the diet is probably largely responsible for the rapid expansion which took place last year in the vegetable canning industry throughout Canada. The increase in 1930 was 64.8 per cent as compared with 1929. Total production amounted to 10,065,614 cans. Department of Agriculture, Ottawa.

Gladys—After I'd sung my encore I heard a gentleman from one of the papers call "Fine! Fine!"
Harry—Goodness! And did you have to pay it?

Dysentery Is a Very Dangerous Bowel Complaint

Mrs. E. M. Ward, 827 Ave. H. South, Saskatoon, Sask., writes:—"When my husband was in France he took dysentery, and was in hospital over a year. Ever since he came back he has had the attacks three or four times a year. I cannot emphasize the good Dr. Fowler's Extract of Wild Strawberry has done for him. He generally takes a few doses and gets relief in a few hours."
"I cannot speak too highly of your excellent remedy, and you may be sure we are never without a bottle of it in the house."

Tinned Hams From Denmark

Danish Methods Of Marketing Sets Mark That Is Hard To Beat

There is food for thought for the Canadian farmer in the recent arrival in the Canadian market of "tinned hams" from Denmark. When it comes to marketing its production, or over-production, if you prefer, the little kingdom of Denmark sets a pace which is hard to beat. Not only do they market their product in all the usual forms, maintaining the dominant position in the British market, but they are now processing their finest cuts, packaging them attractively, and making a strong bid for the larger consuming centres in our own Canadian market. Canadian farmers should find an incentive to opportunity in the situation. A study of the fundamental principles underlying Danish methods might hold much of useful interest.

Health Of Children Affected

Children Of Unemployed Men In Montreal Show Effect Of Malnutrition

The effect of the economic depression on the children of unemployed men has been revealed by the health service of financial federation, conducted by the Child Welfare Association of Montreal. Ninety per cent. of the children, who are being examined at the rate of 200 a week, are underweight. Miss Esther Bath, R.N., director of the Child Welfare Association, stated.

One child was found to weigh 24 pounds less than normal. Lack of nutritious food has also caused dental decay and clinics conducted by the association are busy doing what they can to halt the rot. A youngster of 13 had to have her entire upper row of teeth extracted, Miss Bath said.

Conquers Asthma. To be relieved from the terrible suffocating due to asthma is a great thing, but to be safeguarded for the future is even greater. Not only does Dr. J. D. Kellogg's Asthma Remedy bring prompt relief, but it introduces a new era of life for the afflicted. Systematic breathing of smoke or fumes from the remedy prevents relapses and often effects a permanent relief.

H.B. Trial Shipments

Nothing But Wheat To Be Shipped Over Bay Route This Year

"Nothing will be shipped out of Hudson Bay this year except wheat," said Hon. R. J. Manion, Minister of Railways. Dr. Manion had been asked the attitude of the department to requests for trial shipments of cattle later in the year.

There would be difficulties enough in making trial shipment of wheat without entering into other projects, Dr. Manion said. He drew attention to the lack of feeding facilities at Churchill as an example of the handicaps facing any attempt to ship cattle. The department had been deluged with requests of that type but all had been refused.

Persian Balm promotes daintiness, charm and beauty. Magical in its effect on the skin. There is nothing like it for creating and preserving a lovely complexion. Cooling, caring, it soothes and relieves all roughness caused by weather conditions. Delicately fragrant, it enhances the most finished appearance. Makes the skin rose-leaf in texture. Truly a priceless toilet requisite for every discerning woman.

Report Is Denied

Regina-Saskatoon Edmonton Air Mail Not To Be Discontinued

Officials of the post office department denied reports that the Regina-Saskatoon-Edmonton branch of the eastern air mail route was to be disbanded after July 15. It was pointed out that this story, similar to one some time ago saying all the mail services were to be disbanded, was apparently based on the cancelling of the present air mail contracts in order to give the government an opportunity to review the situation. These contracts terminate at different dates, it was explained.

German Steel For Russia

The German Iron and Steel Trust has agreed to deliver to Russia 80,000 tons of bar iron, the same amount of sheet iron and 40,000 tons of steel products in the next two months at "unstable" prices. The deal was arranged in Berlin by the Russian trade delegation which recently came from Moscow.

Depression Hits Icebergs

Not For Many Years Has There Been Anything Like Present Shortage

It takes quite a bit of water to make a sizable iceberg. No one who has seen one of these floating samples of the Arctic zone would take issue with this statement. "One ordinary iceberg carries around enough concealed moisture to irrigate a ten-acre farm all summer. Coastguard craft which annually proceed to the nesting grounds of the icebergs for the purpose of warning shipping of their proximity to steamer lanes have found a scarcity of them this year. Icebergographers say the situation is without precedent."

Not in a great many years has there been anything like the present shortage of icebergs in the north Atlantic. Last year 440 of these gorgeous spectacles of the sea were reported in the areas of sea travel. This year only two little tramps were located and so far away from steamship lanes as to make it unnecessary to the cowbells around their necks.—Christian Science Monitor.

Ranch Will Breed Cattaloos

Young Buffalo Bull Shipped By R.C. Authorities To Peace River District

British Columbia's first herd of cattaloos, half cattle, half buffalo, are expected to result from the shipment of a young buffalo bull from Beacon Hill Park to the Peace River district. This animal is being presented by the city authorities to Mrs. Emily L. Crawford, pioneer rancher of Fort St. John, for crossing with her cattle. He will be the first buffalo liberated in this province outside a park, the Department of Agriculture here understands.

Keep your stock free from blemish with Douglas' Egyptian Liniment. Removes inflammation, quickly relieves bruises, sprains, strains, swellings, contraction of cords, stiffness of joints and sore muscles.

A Good Fish Story

The season's best fish story comes from Banff Springs, Alberta. A 20-pound trout in Lake Minnewanka, yanked an angler off a pier into the water, but the fishermen held on and with the aid of a police officer and a boat finally landed the prize.

Aeroplane Prospecting

Areas In Northern Saskatchewan Will Be Investigated

The aeroplane will be employed by Professor J. B. Mawdsley of the University of Saskatchewan in locating and charting mineral resources in Northern Saskatchewan. Areas which would otherwise be accessible only with much difficulty can be readily reached by the aeroplane route. Investigation of areas of schist and greenstone presenting favourable prospects for metallic minerals will be made.

Under instructions from the Provincial Department of Railways, Labour and Industries a survey of coal and clay deposits lying north of the Saskatchewan River is also being conducted by Professor W. G. Worcester of the Ceramics Department of the University of Saskatchewan and Walter Hastings, developing engineer. For some time these deposits have been known to exist but they have never been thoroughly investigated as to their extent, quality or commercial value.

The survey is being made with a view to developing this area if tests prove that development would be feasible.

Terrorists Are Sentenced

Mafia Terrorists In Italy Face Sentences Totalling 15 Centuries

One hundred and fourteen notorious Mafia terrorists face sentences totalling 15 centuries as a result of their conviction at a trial in Italy lasting almost a year.

Thirteen of the defendants got life, 16 got sentences of 15 to 25 years, 16 will be imprisoned ten to 15 years, and 69 will go to jail for one year. Fifty-seven others were acquitted. The charges against the prisoners included 48 murders, 26 attempted murders, and many cases of assault, extortion, blackmail, shooting, robbery and bribery.

Zaro Agha, the ancient Turk aptly commented on the occasion of his first "plane ride that he hadn't been so excited in the last 130 years."

Cunard Line's Oldest Known Living Passenger Will Make Atlantic Crossing In New Vessel

If she can make the trip, Mrs. Loring W. Bailey, the Cunard Line's oldest known living passenger, will make a trans-Atlantic crossing in the new 78,000 ton steamer now being built for the line on the River Clyde, Scotland, the first of a pair of swift mammoth ships that will supply a weekly service between New York and ports on the English Channel, making the voyage in four days.

Mrs. Bailey made her first trip to Canada on the Cunard liner "Cambria" in January, 1884, more than 83 years ago. The "Cambria" was a side-wheeler, carried sails, and made the voyage from Liverpool to Halifax in two weeks, being delayed by rough seas followed by dense fog. Her schedule time was ten days.

Mrs. Bailey, who is now in her 90th year, enjoys excellent health and recalls with remarkable distinctness the happening of a long and varied career. She is especially proud of the fact that she is the oldest living passenger of the Cunard Line, which had its beginning in her beloved Canada, in the old grey city by the sea (Halifax) where Samuel Cunard laid the foundations of the famous Cunard Line of today with a fleet of twenty-four ocean liners plying between Europe and America.

Born Lauretine Marie d'Avray, Mrs. Bailey was the daughter of the Baron d'Avray, and first met the light of day on the island of Mauritius, in the Indian Ocean, off the east coast of Africa. It was then and still is one of England's sugar bowls and not a small one either.

When Lauretine was five, years old her parents took her from her tropical home on a journey which was to end in cold Saint John, New Brunswick, where the Baron had secured a position as Superintendent of Education in the Maritime Provinces. The journey was a long one. The family embarked on a sailing ship bound for Queenstown, sailing around the Cape of Good Hope. It took two-and-a-half months to reach the Irish port, their ship passing but one steamer on the entire voyage.

After visiting London and Northern France the d'Avrays set out for Liverpool, where they embarked on the "Cambria" for Canada. Landing at Halifax in mid-winter, Lauretine saw snow for the first time. She thought it was salt until she tasted it, but could not understand why it was so cold nor why it quickly melted in her warm fingers.

In travelling from Halifax to Saint John the family passed over the Cobequid Mountains, in Northern Nova Scotia, in a rude covered wagon, which was drawn for more than a hundred miles through the frigid country over glare-ice. Railroads had not yet made their appearance in that part of the country. The girl's father was very successful in his new post and won promotion until he held the chair of modern languages in King's College, now the University of New Brunswick.

It was while living at the college that Lauretine met and married a young professor who had come from Harvard, Loring Wort Bailey, who afterwards became famous as a scientist, and who was designated as a charter member of the Royal Society of Canada by the Marquis of Lorne. Dr. Bailey's service at the University extended over 47 years.

For many years the Baileys spent their summers at Fredericton. It was here that they celebrated the silver and golden anniversaries of their wedding.

After the death of Dr. Bailey at

"Did you ring it?" "Yes. There is a fly somewhere in the room."—Kasper, Stockholm.

the age of 88, Mrs. Bailey moved to Halifax, the scene of her first landing in the New World. Here she was at guest aboard the Cunard liner "Aquitania," when that giant ship docked at Halifax on July 4, just 91 years after the first Cunardier, the "Britannia," set out from Liverpool, a pioneer in the world of modern shipping.

Recently in speaking of the Samuel Cunards, Mrs. Bailey said: "I knew the Cunards when they lived in Chatham. They used to visit Sheriff Woolhouser in Fredericton. Mrs. Cunard gave me a small statue, about one finger high, when she left Chatham for England. I still have it."

Fox Feeding Guide

Keeping In Step With Season Food To Bring Best Results

Keeping in step with the season is the way to ensure best results in fox feeding, studies in this respect at the Experimental Fox Ranch of the Dominion Department of Agriculture at Summerside, P.E.I., show. The report for 1928, 1929 and 1930 just issued states: "It is absolutely necessary that foxes should be fed in step with the season. When the earth is covered with green vegetation foxes require that vegetation, or the essence of it from animals that have recently been eating it; during the fall months, when ripe vegetation is prevalent, foxes require that ripe vegetation. In the late fall months when frost has destroyed vegetation and the prey of the foxes is in good condition foxes require a high meat ration. When the prey of the foxes is in poor condition and the vixen and her prey are often snowed in, foxes do not require a large amount of food."

Milk A Bone Builder

Another Good Reason For The Liberal Use Of Milk

Scientific research finds another good reason for the liberal use of milk, especially in the diet of the growing child, and that is in its capacity as a bone builder. The human body contains more calcium than it does any other mineral, and the best and cheapest source of supply is milk. Dietetic experts assert that a quart of milk daily ensures the growing child of the best storage of calcium for the manufacture of bones and teeth. It is equivalent in calcium content to 10 large oranges, 10 large helpings of cauliflower, 24 helpings of carrot, 32 eggs, or 20 pounds of beef.—Department of Agriculture, Ottawa.

Speeds Ripening Of Tomatoes

The farmer doesn't very often get a chance to fool Jack Frost, especially on a soft crop like tomatoes, but experimental work at Morden, Man., by the Dominion Department of Agriculture shows conclusively that this can be done. With the advance of the season tomatoes ripen more slowly and the use of ethylene gas speeds up the process from late August on. Fruit in danger of frost damage can be picked and quickly ripened by the use of this gas.

The Republic of Andorra, a small country lying between France and Spain, pays its President a yearly salary of \$15.

ENGLISH ROWING RELIES COMPETE ON THE CONTINENT

Above are seven members of the rowing crew which will represent Great Britain at Lucerne, Switzerland, at the international rowing regatta. These girls will compete against crews of German, Belgian and Swiss girls in several events.

Will Increase Value Of Fish Industry

Fish Flour Is New Product Not Yet On Market

From \$500,000 to \$1,500,000 annually may be added to the value of the fisheries industry of the country by the development of "fish flour," Henry O'Malley, Commissioner of the U.S. Bureau of Fisheries says.

Produced from the edible parts remaining from the filleting or packing of fish, the new product is dried and ground into a fine meal with a pleasant taste, odor and flaky appearance. The new flour is more highly refined than the fish meals used for feeding animals, and in cooking may be easily disguised to make the fish taste unrecognizable, Mr. O'Malley said. At present the flour is not available commercially.

Provided the public takes to the new product, there is a potential production of 20,000,000 pounds of raw material available. It is estimated. Much interest has been shown in the work of developing the flour by national manufacturers and distributors of bakery products and specialized food products.

The bureau has succeeded in making very edible fish flour cookies, mixing the new type with the old-fashioned wheat flour and covering "fishy" tastes with cinnamon or ginger. It is said that the flour can also be used successfully in thickening fish soups or chowders and in the manufacture of salt crackers. Its use in bread has not yet been tried by the bureau.

Only the surface of the possibilities of developing this new product for human food has been touched, according to J. R. Manning, technologist of the Fisheries Bureau.

A Nation Of Fruit Eaters

Average Per Person In Britain Last Year Was 53 Pounds

British people are rapidly becoming a nation of fruit-eaters, according to the Empire Marketing board's report on fruit supplies in 1930. "Last year more fruit was eaten in the United Kingdom than in any previous year," states the report, which mentions that the average consumption was 53 pounds for every man and woman and child. This was an increase of 12½ pounds per person over the previous year.

A pleasing feature of the report is the statement that a higher proportion of the fruit imports was supplied by the Empire last year than previously. Nearly 62 per cent of apples, 49 per cent of the bananas and more than half the peaches were Empire-grown.

Revealing Old Secrets

Settlements Of Olden Times Being Disccovered By Aviators

Secrets of antiquity that have remained hidden for centuries are today being brought again to the knowledge of men by the aeroplane. In Britain, the Middle West, and other historical regions throughout the Empire an air-borne camera is revealing details of towns, settlements and works of olden times that are assisting archaeologists mightily in their reconstructions of the world as it was fifteen, twenty or more centuries ago.

For a long time, Egypt was the chief granary of the Roman Empire.

Long distance racing matches for homing pigeons date back to 1818.

Plea Is Made For Retention In Canada Of Able Men To Carry On Important Research Work

Keeping Up Vitamin Supply

Diet Of Milk, Meat, Eggs, Vegetables and Fruits Is Very Helpful

Medical science still knows comparatively little about the necessities and supply of vitamins, although it recognizes that they "produce profound changes in growth," Dr. F. P. Tisdall, of Toronto, declared in a scientific session of the Canadian Medical Association at Vancouver.

"Everyone in the world seems to know all about vitamins but the medical profession," he remarked. After demonstrating by slides the result of experiments with vitamin diets, he concluded by stating that, as a practical application of what is known, a diet of milk, meat, eggs, vegetables and fruits, should go a long way in supplying the essentials to proper nutrition.

Fifty per cent. of our diet today is made up of refined food and sugars, he said, which is lacking in vitamins and almost lacking in proteins. The problem lies in seeing that the amounts necessary to make up for this deficiency are found in the remainder of the diet.

"The deficiency of a vital element cannot be made up by taking an excess of another," he added. Experiments had proved this. It has also been demonstrated that when fed on special foods children had reached a greater growth than those fed a "normal" diet.

The difference in the vitality between the Oriental and the Occidental people has been traced by an authority, he said.

At least ten minerals are essential to life, said Dr. Tisdall, but all except three are found in sufficient quantities in our normal diets. The three are calcium, iron and iodine.

Weaning Young Pigs

Natural Weaning Has Been Found To Bring Best Results

Nature's weaning gives best results with a litter of young pigs, and to obtain this, feed suitable for young pigs should be provided in the creep. A good mixture for the purpose is a half and half combination of mid-dlings and finely ground oats from which the hulls have been sifted. Young pigs will start to nibble at the feed at about two to four weeks of age, and by the sixth or seventh week should be eating quite freely. Under such a procedure shock incidental to more abrupt methods is overcome and weaning develops as a natural event.—Pamphlet 135 N.S., Department of Agriculture, Ottawa.

Keeping Cream Fresh

Studies in keeping cream sweet made by the Dairy and Cold Storage Branch of the Dominion Department of Agriculture, show conclusively that food water not only keeps cream better than when it is placed in a refrigerator, but that it takes considerably less ice. The reason for this lies in the fact that the ice water, being a better conductor than the cold air of the refrigerator, cools the cream more effectively.

New hose equipment makes it possible to direct a stream of water around a corner, thus helping firemen to reach some fire spots more effectively.

Need for a better understanding of the significance of and necessity for research was urged by Dr. H. M. Torry, president of the national research council, Ottawa, Ont., addressing the Canadian Society of Technical Agriculturists, in session at Guelph, Ontario. He advocated more co-operation between scientific men.

A plea for the retention in Canada of able men was made by Dr. Torry, who deplored the circumstances which led to the best brains leaving the country.

"You can't make a first class country with second class men," he said. "We must hold onto our best brains. We have material out of which to make leaders for every activity to be found in Canada," he stated in an address in which he traced the development of national research movements throughout the world.

Production costs will strike a level that will help to stabilize hand values, said Dr. O. C. Hines, president of the American farm economics board, who also spoke. While the next two or three years might mean a great deal of suffering to producing countries, he said, the outlook now is brighter than it was a short time ago.

Growth of the organization during the past year was reported to members by W. T. Macoun of Ottawa, in his presidential address.

Mr. Macoun emphasized the fact that three new branches of the organization had been formed during the year, and reported increased activity in all departments of the society's work. He urged the members to pay more attention to the average man and suggested extension work of the C.S.T.A. be increased in the future.

Egg Consumption Is High

Per Capita Consumption Of Eggs Higher In Canada Than U.S.

Prof. J. V. Rice of Cornell University recently called attention to the Canadian per capita egg consumption which is shown as 28.8 dozens, whereas that for the United States for the same year is shown as 16.7 dozens. While these figures are for 1925, as the figures from the most recent United States census have not as yet been made available, they show that Canada increased her per capita consumption from 15.1 dozens in 1901 to 26.3 dozens in 1925, and to 30.8 dozens in 1928, whereas that for the United States has hovered around the 16 dozen figure for some 39 or more years.

The editor of a produce journal in the United States comments as follows: "It would seem that the Canadian figures would give a fair answer to the question as to whether or not our increasing production of eggs can be disposed of by increasing consumer demand. No doubt, more careful standardization of quality will have some effect upon consumption but it will take, as well, considerable additional effort to bring our per capita consumption up to the same level as that in Canada."

Cattle For British Market

Twenty-seven cars of pure bred cattle arrived in Winnipeg from further west the other day en route to the British market over Canadian Pacific rails. This is the seventh shipment of the kind from Western Canadian ranches since last October.

"You annoy me from morning till night, Minna." "Impossible, madam. You are not up till mid-day!"—Friedrich Schiller, Munich.

HEADACHES

Needless pains like headaches are quickly relieved by Aspirin tablets as millions of people know. And no matter how suddenly a headache may come upon you, you can always be prepared. Carry the pocket tin of Aspirin tablets with you. Keep the larger size at home. Read the proven directions for pain, headaches, neuralgia, etc.

SUNDAY SCHOOL LESSON

JULY 12

THE PREACHING OF THE APOSTLES

Golden Text: "We must obey God rather than man."—Acts 5:29.
Lesson: Acts 3:1 to 4:13
1 Corinthians 12:1-25.
Devotional Reading: Romans 10:8-15.

Explanations and Comments

The Arrest Of Peter and John, 4:1-4.—Priests and Sadducees and the captain of the temple were troubled because Peter and John proclaimed the resurrection of Jesus Christ. The captain of the temple was the commander of the temple guard, and was himself a priest second in rank only to the high priest. The Sadducean party, to which the high priestly class at this time belonged, did not believe in the doctrine of a resurrection, and, of course, it was especially galling to them to have the apostles teach the people that Jesus had risen from the dead. They arrested the apostles but because it was too late for a trial that day they had them imprisoned for the night.

The result of Peter's preaching at the temple was that about five thousand men believed in Christ. No wonder the authorities were startled when the Jerusalem high priest called "Crucify Him," were now convinced that the Crucified was the Risen Saviour.

Peter's Boldness Before the Sanhedrin, 4:8-12.—On the morning after the arrest, the high priest, the rulers, the scribes, who composed the Sanhedrin, sat in session. The Sanhedrin was the supreme judicial body which was supreme in all matters affecting the Jewish law, the sentence of death, being the only power which they might not impose. Annas and Caiaphas, before whom Jesus had been brought a prisoner, Annas and the other great officials were present. The Sanhedrin sat in a semicircle and the prisoners, Peter and John, stood before them. The man whom Peter had healed was also there, as a kind of accessory to the "great deed."

"By what power, or in what name, have ye done this?" the officials demanded.

Then Peter, filled with the Holy Spirit and eager to use the chance thus given him, replied, "Ye rulers of the people (chief priests) and elders (representatives of the Sanhedrin), if ye have examined me concerning a good deed done to an impotent man, by what means this man is made whole (if like crutches we are forced to defend ourselves for doing good), be it known unto you, and to all the people of Israel, that in the name of Jesus Christ of Nazareth, whom ye crucified, whom God raised from the dead, I stand before you."

Thus Peter answered their question and with superb daring accused them of the crime of having put to death the Lord's Anointed. "It is to the Stone which was set at the corner of the temple, which was made the Head of the Corner." The stone was the head of the corner of the temple at the angle of two walls which supports and unites them. Had the arch been in common use the figure of the keystone would probably have been employed instead.

"For ye have killed the Author of life: for neither is there any other name under heaven, that is given unto men, whereby we must be saved." "We," in the Greek has an emphatic position at the end of the sentence, and it is the name of the seven. By what name have ye, ignorant men, done this? There is no other name wherein we—you the judges and we the fishermen—must be saved.

"I and a man trying to lift a stone, which is too heavy for his strength; and I say to him: 'Get out your tackle and pulleys, and then you can lift it. You cannot move that stone without a tackle and pulley.' And no man can take the fruits of civilization unless he lays hold on powers other than his own; and no man can take the fruit of high, noble, divine, moral, spiritual culture unless he reaches out and lays hold of powers that are not his own, that make for righteousness."

The Apostles Threatened and Dismissed, 4:13-22.—The Sanhedrin marvelled at the boldness of Peter and John, who, they perceived, were unlearned and ignorant men; and seeing the man that was healed standing with them, they could say nothing against it. They could neither dispute the fact of the cure nor answer the arguments of Peter. "What must we do with these men?" they questioned. Accordingly they decided to threaten the apostles, hoping thus to prevent their speaking to any one "in this name."

Peter and John were recalled and were charged not to speak nor teach in the name of Jesus. Respectfully and magnificently Peter replied, "Whether it is right in the sight of God to hearken unto you rather than unto God, judge ye; for we cannot but speak the things which we saw and heard."

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any drugstore.

More than 7,500 varieties of toy soldiers with the uniforms worn all over the world for 2,000 years were exhibited at the Leipzig Fair.

A Provincial Pleasure Resort

The Opening Function Of Lake Manitou Provincial Resort

Saskatchewan, making a definite bid for its proportionate share of the approximately \$300,000,000 spent by tourists in Canada, annually, has adopted the aggressive all-weather road policy by establishment of one of the most unique and attractive tourist and family resorts in the Dominion.

On July 4, Hon. J. T. M. Anderson, Premier of the Province, officially opened Manitou Lake Lodge, the central building of the resort site which is located in the Provincial Park which flanks the shores of Little Manitou Lake, renowned for the medicinal properties of its waters.

Hon. J. A. Merkle, under whose direction the relief work has been conducted, and other members of the Cabinet, as well as a considerable number of Canadian journalists, who were attending their annual convention at Regina, were present. There was a great gathering of people from almost every part of the Province and from outside points, and the occasion was in every respect a gala one.

This marked the establishment of a Provincial Summer resort, convenient of access to the people of a great prairie region, delightful in its natural beauties, providing good accommodation and offering many of the requirements desired by those seeking rest and recreation.

Its establishment is part of a Provincial programme to show the people of the Province, that after spending their working days at home, they do not need to seek their rest and

work to clear roads and paths and camp sites. A picturesque lodge has been erected, almost entirely of native material and sixteen excellent cottages built. The collection of the stones for the building afforded much for the furtherance of the work on hand, and removing the stones from the land. The open winter greatly facilitated this work.

The Lodge and the cottages are thatched with rushes from a small bay of the lake. They were cut after the water had frozen, when the farmers harvested them by means of moving machines driven over the ice. They were then sorted and tied in bundles by men experienced in this work. It was discovered that there were a number of men among the unemployed from Ireland and elsewhere, who were experienced thatchers, and these men were entrusted with the roofing of the lodge and cottages, and in so doing they were given employment. Not only has a picturesque and economical resort been achieved, but the thatch is proving to be both serviceable and economical.

The lodge is equipped with modern conveniences, including running water and electric light, and there is water and light in all the cottages. A cooking kitchen 51 feet long by 10 feet wide has been built for the convenience of cottager and camper, and in its longitudinal plan provides for the accommodation of many summer cooks without conflict in their operations.

A great deal of work has been done in clearing land and in making winding and attractive paths through the woodland gaps. The cottages have been prepared, with flat camping space for the tent, and

Lake Manitou Lodge built by the Government of Saskatchewan to supply work for unemployed farmers. Native stone was used in construction and the roof is thatched with rushes cut from the marsh lands near by. The photo shows the building in course of completion.

recreation abroad. Saskatchewan summer days are long and fair; natural beauties are many and varied, and there is no need to look elsewhere for holiday grounds. So the enjoyment at Lake Manitou this summer will be pleasant to contemplate, that many of the facilities which minister to their pleasure and comfort, in their creation furnished sorely needed work and wages to many a bread-winner. The province was the keynote that prompted the development of this resort.

Manitou Lake, which lies close to the town of Watrous on the Canadian National Railway, is a lovely oasis in the midst of a flat prairie. The prairie, between the northern end of Lake Manitou and the southern end of Lake Regina, is a lovely oasis in the midst of a flat prairie. The prairie, between the northern end of Lake Manitou and the southern end of Lake Regina, is a lovely oasis in the midst of a flat prairie.

The water of the lake, which changes the colour of the quick cloud shadows sweep across their surface, are ideal for swimming, boating, and summer sports. From time immemorial, the Indians believed they were endowed by the Manitou with healing virtues, and many a graver sickness caravan bringing sick and suffering to seek relief, halted by the banks.

Nor was this an idle belief. Science declares that the waters of this lake may have real value in skin and rheumatism affections. Remarkable cures have been ascribed to imbibing and bathing.

Situated as it is, not only convenient to railway transportation, but on fine highways, which make it easily accessible from Regina, Moose Jaw, Saskatoon and other prairie points, it is rapidly becoming a Mecca of summer vacationists from all over the province. The Provincial Government, realizing this, has wintered so arranged a portion of its unemployment programme, in order to do something for the unemployed who have already done to the place. The first object was to relieve unemployment, and the second, to provide a Mecca of summer vacationists from all over the province. The Provincial Government, realizing this, has wintered so arranged a portion of its unemployment programme, in order to do something for the unemployed who have already done to the place.

About \$50,000 was disbursed in this work, and the balance was paid by the Federal Government, and the other half by the Province under the unemployment programme. Practically all of the work was done by farmers of the district, and a goodly proportion of the work was done by farmers of this class. Approximately 500 men went through the payroll on a rotation system that was designed to be as equitable as possible. About 75 per cent. of the workers were from the farms, and a number of them lived at home, and were enabled to go to and from their work each day. Workers from distant points, and those unable or too far away to return home each evening, were well looked after in the quarters of the sanitarian company. There were about 160 workers of this later class employed.

There is a fine spring of fresh water that wells out of the hillside, and which is made possible an annual supply piped into the lodge and

Keep Free From Fat—Feel Younger

Unlike most salts, Kruschen isn't a laxative—if that's all you want any kind of salts with any kind of a label will do—but that's all you want?

When you take Kruschen Salts you not only stimulate the bowels, liver and kidneys to function naturally and perfectly, but you supply every internal organ, gland, nerve and fibre in the body with nature's own revitalizing and rejuvenating minerals.

Get a bottle of Kruschen Salts at any drug store—take "one-half teaspoon in a glass of hot water every morning before breakfast—cut down on sweets and fat forming foods and get some moderate regular exercise—it is just a few days indulgence changes to activity and life grows brighter.

A Virginia woman writes: "I just started on my second bottle of Kruschen Salts and have been losing weight right away. You have fashioned the secret of flesh reduction."

cottages, and is available for the use of the campers. A scientific system of toilet tanks provides for the sewage from the lodge in a modern and hygienic manner.

The beaches are delightful for bathing and swimming. The slope to the depths are grassy and the water is so clear, accidents to the children who delight to paddle along the shore.

The waters are buoyant and pleasant for swimmers, who require little effort either for support or propulsion. A bath may remain cradled in the embrace of the lake, and float in total oblivion of the outside world and its cares. The healing qualities of the water are really remarkable, and have been proved by minor wounds or abrasions after a few immersions, and they have disappeared.

There are boats available, and during the season, a merry laughing and joking, and a good deal of aquatic sports. Riding a surf board towed by a motor boat is a popular sport, and it is a good idea for youth and action to see a handsome girl erect upon a surf board coursing through the waves.

There is golf links close at hand, where the devotees of the "ancient and honorable game" may follow the ball and driver, and cry "fore," to their heart's content.

The Northern Speart

Plans For the Development Of the Townsite Of Churchill

Plans for the development of the townsite of Churchill, Manitoba, support of the northern Manitoba and terminals of the Hudson Bay Railway, call for the construction of a modern town, with central heating, fireproof public building and semi-fireproof residences, boulevards, parks and squares.

Constructed under a town planning system, approved of by Hon. Donald G. McKenzie, Provincial Minister of Mines and Natural Resources, every facility of a modern town will be provided. The townsite will be ready for settlement next year. No property will be sold, but it will be disposed of in 50-year leases, subject to revision every five years.

Churchill will be blessed with wide streets for through traffic, protected residential districts and generous space for recreation. All streets, parks and squares will be named after early explorers and heroes of Canadian history.

Good Poultry Record

Performance Of B.C. University Rhode Island Reds Is Attracting Attention

Professor E. A. Lloyd, head of the poultry department of the University of British Columbia, states that the members of the University's family of Rhode Island Reds have already averaged over 100 eggs in their second year and give promise of exceeding the average of 200 before the fall. Such production has never been recorded in any strain or breed anywhere in the world, he said. There are eight birds in the family.

The inventor of a new riveting machine claims it is noiseless. He hopes he turns his talents next to peanut brittle and celery.

BABY'S OWN SOAP

"It's Best for You—Baby too"

EXPLAINS REASON FOR APPENDIX TO STAMP REPORT

Ottawa, Ont.—How the offending Appendix XII, attached to the report of the Stamp Commission which was enquired into trading in grain futures, came to be affixed there was explained in the House of Commons when the prime minister passed a written reply to a series of questions asked by Hon. W. R. Motherwell (Lib., Melville). The appendix takes the form of a chart filed by the Winnipeg Grain Exchange, and purports to show that only on a few days in the past four years were the prices for No. 3 Northern paid by the pool higher than those which could have been secured in open market trading.

Explaining the events which led up to publication of the report, Mr. Bennett's reply says: "Mr. Commissioner Evans and the secretary of the commission (L. B. Pearson, first secretary of the Department of External Affairs), appeared before the prime minister on Saturday, May 2, with a typewritten copy of the report. The prime minister suggested to Mr. Evans and Mr. Pearson that the report should be printed, if possible, in time to be mailed to the chairman by the 'Mauretania,' which sailed from New York the following Wednesday, May 6. Only those exhibits which had been selected by the chairman were printed as appendix to the report. Among them was the chart which became Appendix XII.

"Neither the prime minister nor any representative of his government perused or checked the report or its appendices before they were sent to the king's printer. The commission was responsible for its report.

"The main report was sent at once to the printing bureau on May 2. The appendices were sent when the proof of the main report had been printed.

"A total of 10,126 copies of the report minus Appendix XII have been distributed.

"The appendix has been removed from all copies of the report in possession of departments of the government, and those persons to whom the report, with Appendix XII, attached, has already been sent, have been or are being communicated with requesting them to remove the appendix in question."

Court Gives Judgment On Radio Broadcasting

Decision That Control Belongs To Dominion Parliament Not Unanimous

Ottawa, Ont.—Control of radio broadcasting in Canada belongs to the Dominion parliament and not to the provincial legislatures. This was the decision of a majority of the judges of the Supreme Court of Canada, handed down in the radio reference.

The court was not unanimous. Chief Justice Anglin, Mr. Justice Smith and Mr. Justice Newcombe ruled in favor of the Dominion's claim to full jurisdiction over radio on the ground, as the chief justice put it, of "convenience amounting to necessity."

In dissenting judgments, Mr. Justice Rinfret and Mr. Justice Lamont held the jurisdiction of the Dominion was not unlimited and took the stand that the provinces were entitled to a measure of control, particularly over radio receiving operation.

The case was one of the most important heard before the supreme court in some time and turned on the construction of the British North America Act. It was brought about by the action of the Province of Quebec which contested the Dominion's claim to complete legislative control over radio.

Court-Martial For Aviator

Chateauroux, France.—The daredevil military aviator Sergeant Herve Martin, will be court-martialed on serious charges for his responsibility in the accidental killing of two persons and injuries to two others. He was flying low above an automobile when the under-carriage of the plane struck the occupants, decapitating one of them.

W. N. U. 1897

Five Killed In Plane Crash

Opening Of Air Pageant At Hamilton Marked With Tragedy

Hamilton, Ont.—Five persons were crushed to death, in a Travelair monoplane here when the pilot, attempting to swerve to avoid a crowded field, lost control of his machine as the fabric on the left wing ripped and sent the plane flying over on its back.

The dead:

Captain Robert Sterling, of Montreal, pilot of the plane.

Harold Raine, general superintendent of the Canadian Press, Toronto.

J. H. Maher, Jr., owner of the plane.

Charles L. Daly, Jr., Toronto parachute jumper.

Alfred Rogers, of Hamilton, Ont.

The plane had just participated in a "rat chase" over the city in an effort to draw a crowd to the airport, where the pageant was to have been held. The pilot swerved downward, but on account of the crowded field apparently changed his mind and attempted to zoom back up, but the fabric of the machine was ripped from the left wing, and the plane crashed about 150 feet to the ground.

The plane was a mass of debris and broken parts were scattered for yards around. All except Rogers were dead when taken from the wreckage, and he died in an ambulance en route to the hospital.

What was to have been a brilliant opening of a trans-Canada air tour to help make Canada more "air-minded" was marked by tragedy.

The plane that crashed was one of a number of planes that was to have travelled to the Pacific Coast and back after a two-day air carnival at Hamilton. Captain Sterling would have piloted it throughout the tour.

Leads In Disarmament

Britain Has Now Gone The Limit Says Premier MacDonald

London, England.—"We have gone to the limit of the limit of the example," said Prime Minister J. Ramsay MacDonald a trifle wearily in the House of Commons, as he took the navy, army and air services, comparing the British figures with those of the other great powers.

"The naval appropriations of other countries have increased in much the same proportion as ours has decreased," observed the prime minister, speaking on the navy.

As he closed his disquieting comparisons Mr. MacDonald pleaded would appeal to the other nations interested in peace and disarmament to admit that one nation cannot by its own example bring about disarmament—that it is the duty of every one to join together and make further disarmament possible by international agreement.

Radio Policy

Quebec May Appeal To Privy Council On Question

Ottawa, Ont.—The finding of the majority of the Supreme Court of Canada in favor of exclusive jurisdiction of radio was gratifying to Hon. Alfred Durneau, Minister of Marine, whose department has charge of radio.

"We did not think it advisable to outline a policy on radio broadcasting until we got the decision as to jurisdiction," said the minister. "It now rests with Premier Taschereau whether he will appeal to the privy council. If Quebec does not appeal we will take up the question as soon as the time limit for making an appeal has expired."

MacNider Praises Horridge

Ottawa, Ont.—Back from a ten-day visit to Washington, Col. The Hon. Handford MacNider, United States minister to Canada, Monday, June 29, spoke in glowing terms of the impression made by Major W. D. Horridge, Canada's new minister, to the United States. "Everybody was tremendously impressed with Major Horridge," Col. MacNider declared.

R.C.M.P. Changes

Winnipeg, Man.—Recently appointed to the Manitoba and western Ontario command, Royal Canadian Mounted Police, superintendent Richard Field arrived here from Dawson, Y.T. He succeeds Supt. A. B. Albard, who was transferred to the Yukon post.

HEADS MEDICAL MEN

Dr. Alex. Primrose, of Toronto, who was chosen resident-elect of the Canadian Medical Association for 1932 at a meeting of the Council at Vancouver recently.

British Team For Canada

Riflemen From Old Country To Enter Competition At Ottawa

London, England.—Commander Sir Lionel Fletcher, R.N.R., retired, has been appointed captain of the British team which under the auspices of the National Rifle Association, has accepted the invitation of the Dominion of Canada Rifle Association to shoot in matches in Ottawa under Kolar and Mackinnon conditions as known at Bisley.

The team will leave England by the Cunarder Ascania on July 24, arriving in Montreal on August 2, and will arrive home again, travelling in S.S. Auraria, by about August 29.

United States Warns France

Germany Will Declare Moratorium If Hoover Plan Fails

Washington, D.C.—The United States has warned France, that failure of President Hoover's moratorium plan would unquestionably result in Germany's declaring a moratorium of reparations under the Young plan.

The acting secretary of the state department said that the French government had received pleasantly the United States' formal re-expression of its position on a debt moratorium.

Joan Of Arc Memorial

Rouen, France.—Lady Douglas Haig has just presented to Monsieur de la Villerabel, archbishop of Rouen, primate of Normandy, a purse of \$2,000 collected among English people to help towards the memorial chapel to Joan of Arc, to be erected on the market place of this city.

Complete Epochal World Flight

Post and Gatty Circle Globe In Less Than Nine Days

Roosevelt Field, L.I.—Wiley Post and Harold Gatty completed a flight around the world at 7:47½ (E.S.T.) July 1st, marking the 16,000-mile journey in less than nine days with 13 intermediate stops.

At 7:44 p.m., the white ship "Winie Mae" shot at terrific speed out of salmon-colored sunset and a crowd of approximately 2,000 broke into wild cheers.

Post, the one-eyed pilot, who had done all the flying on the journey around the world, shot his swift plane over the crowd, banked steeply and made three leisurely circles of the field, selecting the best possible place for the landing.

Gatty and Post completed the world flight in eight days, 15 hours and 51 minutes. Their actual flying time in the air was only four days, ten hours and eight minutes.

As soon as the plane stopped rolling, Gatty and Post climbed from the cabins, turned their plane over to a police guard, and entered an automobile which carried them half-a-mile across the field to the administration building.

As they left the automobile, friends and admirers of the flyers grabbed them up and carried them the last stage on their shoulders. Flashlights boomed in the falling darkness.

Suddenly the police lines gave way and the field became a bedlam with excitement rulling supreme, and numerous fist fights breaking out as police, with night sticks in their hands, attempted to force a way for the flyers.

New Constitution For Spain

Universal Suffrage, Religious Freedom and Abolition of Titles

Madrid, Spain.—A preliminary draft of a new constitution providing for universal suffrage, religious freedom and abolition of all titles of nobility was made public by the government commission created some time ago to prepare the document.

It provides for a presidential term of six years, the president to be elected by a majority of the senate and the Lower House in joint session. There would be 240 senators divided equally among the "cultural, industrial and labor entities," and 470 deputies elected by popular suffrage, including the vote of women.

Returns from the day's general assembly election confirm the original belief that the Conservative Republican-Socialists have an overwhelming majority in the assembly with the Monarchists left only five deputies out of more than 350 and the Communists with none at all.

ASSISTANCE IS PROMISED FOR DROUTH AREAS

Ottawa, Ont.—Expressing the fear that Canada is faced with perhaps "the greatest national calamity that has ever overtaken the country," as a result of the serious drouth which prevailed in Saskatchewan and sections of Alberta and Manitoba, Rt. Hon. R. B. Bennett, prime minister, announced in the House of Commons, that he would submit to parliament a measure for relief of the sufferers.

The prime minister announced also that it was his intention, as soon as disposition has been made of measures on the order paper and other measures to be considered, to submit to parliament unemployment measures "that we hope will enable us successfully to grapple with that difficulty during the coming winter and the balance of the year that is before us."

Prefacing his remarks by the statement that this is the 64th anniversary of Confederation, Mr. Bennett went on to declare that Canada could contemplate the past with some measure of pride and satisfaction and the future with courage, hope and confident faith. But with respect to the present, conditions in certain parts of the west were such that "notwithstanding the copious rainfall of the last 39 hours it will not be possible for any harvest in the way of grain to be reaped in a very substantial area."

Probably more than 5,000,000 acres of land had been adversely affected by the drouth, continued Mr. Bennett. From information received from the government, it was learned that at least 100,000 people were affected directly, and also their herds.

Canada, he asserted, had not hesitated to meet disastrous conditions affecting other countries. Therefore he proposed to ask parliament to assist in meeting this. The extent of the assistance would necessarily depend on information as to the need.

Co-operation of the Liberal party in any measures for meeting the situation was expressed by Rt. Hon. Mackenzie King. Co-operation would be given in the fullest measure by all members associated with him. He suggested that, as considerable sums would have to be spent in connection with this emergency, as well as unemployment, something in the nature of a national relief board should be established.

Mr. King remarked that at the time of the Halifax disaster a relief commission had been appointed to administer a fund of \$20,000,000. He was confident that \$20,000,000 would not begin to meet what the administration would have to spend in connection with relief this year.

Premier Bennett referred to the constitutional difficulties involved in administering federal funds for provincial purposes. The Halifax board, he stated, had operated under the terms of the War Measures Act, which could not now be invoked. However, it was suggested by Hon. Hugh Guthrie, Minister of Justice, that, if parliament declared unemployment an emergency, the Dominion Government could take direct steps to deal with it under certain provisions of the B.N.A. Act.

Injured Aviatix Goes Home

Ruth Nichols Made Journey In Ambulance Airplane

Armonk, N.Y.—Ruth Nichols, Rye aviatix, whose proposed trans-Atlantic flight was interrupted by a crash in which she was injured at Saint John, N.B., returned home in an ambulance airplane piloted by Clarence Chamberlain.

Her representatives said she expected to be ready to start her interrupted trans-Atlantic flight as early as her plane had been rebuilt, or in about six weeks.

Demanda Pool Inquiry

Edmonton, Alberta.—Demand for a public inquiry into the operation of the Alberta wheat pool and its elevator system, such as was recently conducted in Manitoba, was made by W. R. Howson, Liberal member of the legislature for Edmonton, in a public statement issued here.

Palestine's population has just been estimated at 900,000.

\$10,000,000 GOES UP IN SMOKE

This picture was taken when the fire which destroyed part of the famous harbour of Saint John, N.B., was at its height. The scene, looking south, shows some of the piers burning rapidly while ships are being towed away from the fire zone. Before the tragic conflagration had burned itself out more than \$10,000,000 dollars' worth of damage had been done.

Homestead Regulations

The new provincial Homestead Act came into effect on July 2d, and homesteads are now open for filing on. Some of the principal features of the new regulations are—

Any male or female British subject who has attained the age of 17 years, having resided in Alberta for 3 years and for 12 months prior to filing, may take up land at a fee of \$50—\$10 at the time of filing and \$40 when patent is secured.

Stony Plain and District

The regular Wednesday half holiday in the Town of Stony Plain has commenced, and will continue thru June, July and August, when all places of business close at one p.m.

Mr and Mrs F M Ulmer have as guests this week Rev Jac M and Mrs Hennig and family of Billings, Montana; and Rev M Hennig, of Mannville.

Mr Chas Schultz, of Vancouver, was in town this week, as a delegate to the Lutheran Synod. He was accompanied by Mrs Schultz, Miss Edna, and Eddie, Raymond and Harold Schultz.

Miss Elizabeth Kulak, R. N., of the Municipal hospital at Onoway, is spending a vacation at Jasper. The young lady will pay a visit to her parents here, Mr and Mrs Val Kulak Jr., before she returns to her duties at the hospital.

Donald MacLeod, M.L.A., was a business visitor to the City on Tuesday.

Mr and Mrs J F Kimmerly and Mr and Mrs Lloyd Kimmerly arrived back in Stony Plain last week from Memphis, Tennessee. They traveled by motor car, and had a very good time coming up the 3000 mile trip. The party left here last fall, going down by motor.

Miss Catherine Alt, who has been teaching at Clairmont school the past session, is at present in Edmonton, attending the Summer School.

Miss Q Donaldson, who had been teaching at Behrens school, near Erskine, arrived home Friday. Her brother Manly, who had the school at Faust, is taking a trip farther north before returning home.

Inga Councillors held a day and evening session in Stony Plain on Tuesday.

Owing to the pressure on our columns this week, the full account of the Lutheran Synod proceeding could not be given. This will be printed in our next issue.

Mr and Mrs Michael returned on Sunday from their motor trip to Lacombe.

The new service station is about completed, on Mr P Henkel's acreage, at the Meridian and Baseline corner. Gas, oils and accessories will be on sale; with the possibility that ice cream and sandwiches will be served in another department.

The Bert Becker orchestra played for the dance up at Heatherdown last night.

On Tuesday evening Muir Lake Community Ass'n held its regular meeting, at which quite a number of the members were present. A dance for members followed.

M M Mecklenburg, the Optician and eye specialist, will be in Stony Plain on Friday, July 24th. See him, and see good.

Sporting Notes

Onoway's ball team played Stony Seniors here on Friday evening. Score: Stony 8 runs; Onoway 7 runs. Stony's battery, Enders & Lory.

The bad weather on Sunday kept the three Intermediate ball games from being played.

Sale at the Grove.

The old Morrow store will see a bigger crowd in it than was ever before seen, when the tea and sale of home cooking and fancy work opens at 5 p.m. on Saturday next, July 11th. There will be a fish pond, and ice cream will be served. The feature of the occasion will be the big lunch served, at 25c. the customer. The sale is in aid of St. Joseph church.

Spruce Grove News.

Mrs R Sherwin and family are spending a month's vacation at Seba Beach.

Rev G Poetsch returned on Monday from the Lutheran Ministerial Conference, held at Saskatoon.

There will be a Missionfest held at St John's Lutheran Church (Manitoba Synod) on Sunday next, July 12th.

Mr Reg. Pilcher has rented the Wangler cottage on Main street.

About a dozen of the local Boy Scouts are camping this week at Rotary park, Edmonton Beach.

Mr Wm McLeod is leaving on Sunday next, the 12th, on a trip to Prince Edward Island.

Mr C Brabbins, who has been in charge of the Pool elevator here for the past two years, left this week, to take charge of the Pool elevator at Westlock. Mr Sutherland, who had been operating the elevator at Westlock, will now have charge of the Grove elevator.

The Winterburn picnic, postponed from July 1, was held on the 8th, and proved quite a success. The dance in the evening finished off a good day.

Chicken thieves have been operating around here again. A prominent villager lost about 20 head one night last week.

Mr J P Mills, the popular manager of the Pool elevator at Acheson, has been moved to Athabasca.

The Councillors of Spruce Grove M.C. met in Municipal hall on Monday, 6th.

The Horseshoe King is having a busy time picking up a competent team to bring in to the Edmonton Ex. next week.

Gloria Hills junior ball team played the local Tommycoys on Sunday evening; the latter winning by a good score. The stock inspector is bringing a team up to Gloria Hills next Sunday.

Messrs H Loeblich and W Brox helped Stony Seniors beat Onoway's team on Friday night; and Dave Bell was the umpire.

Mr M Schellenberger has just finished two very successful well drillings—one for Mr W C Williams, Holborn, which went down 385 feet; and one for Mr S Seitsinger, at Golden Spike, where water was obtained at 100 ft.

ACROSS the Dominion sweeps a wave of national enthusiasm. Canadians are striving forward on this tide of a fresh prosperity. General Motors of Canada, Limited, pays tribute to the "Forward Canada" Movement with "Canada on Parade," a radio hour every Friday evening, typifying the spirit of Canada's progress.
Listen for "Canada on Parade," the catchy signature song of the series. Buy the sheet music at your music store, or write to your favorite radio station for an introductory free copy.

Golden Spike

Mr and Mrs P W Trautman have as guests at their home this week: Mrs F Herman, of Saskatoon; Mr Ed Hunter, of Saskatoon; Mr and Mrs Willie Lang, Portland, Ore.; and Mr Wm Schultz, who has come from the dried-out country near Saskatoon, Sask. and is mightily pleased with the looks of crops in the Edmonton district.

Some farmers on the low-lying lands are beginning to think they have had enough moisture for this season.

Mr L V Schoepp, who had his application before Spruce Grove M. D. Councilors at their meeting on Monday, for the use of the road allowance alongside his farm, had his application granted.

Saws Sharpened.

Have your Hand Saws attended to by John Metzler. Leave them at Woods/Butcher Shop. 56

Personal Mention.

Mrs J Clinton McElree, Mr Ross and Mr Willard McElree, of St. Louis, are guests of Mr and Mrs J F Clarke and family. They will motor to Jasper Park, to meet Mr and Mrs Franklin Clarke, before going on to the Coast.

Mrs James Malloch entertained at Bridge on Friday evening, in honor of Mrs J Clinton McElree. Three tables playing, with the prize going to Mrs J F Clarke.

Mrs R A Walton entertained on Monday evening at Bridge for Mrs McElree; Mrs R M Outway carrying off the first prize.

Presentation to Miss Wibray

On Friday evening a surprise party was given Miss Helen Wibray, the popular teacher at Warden school; when about two score of the residents of the district waited on her at the Warden Teachers and gave her a very handsome present, as a token of the esteem in which she is held. Miss Wibray has been teaching at the Warden school for the past four years. A very pleasant evening was spent.

The W. I. Gives Prizes.

The prizes awarded for general proficiency to the pupils in grades 1 to 8 (inclusive) by the members of Stony Plain Women's Institute were won by—
Grade 1—Ernest Horn
Gr. 2—Edw. Litzenberger
Grade 3—Adam Trapp
Grade 4—Gustav Horn
Grade 5—Bianche Reiser
Grade 6—Thelma Groubek
Grade 7—Emmâ Fuhr
In Grade 8 the prize was for the best essay on "The Progress in Education in the last 100 years." First prize went to Emmy Fischer. Bert Becker's paper on this subject was of such an excellent character, it was awarded second place.

Holborn Happenings.

On Saturday, July 4th, a picnic was held at Government Reserve Park, at the river, where the rifle club hold its shoots. About 58 members of the club turned out, and some good prizes were awarded the successful contestants. C W Barth was high man, making 24 out of a possible 25.

Holborn Junior U. F. A. held a picnic at the same time and the many games and contests kept the youngsters busy all afternoon.

Emil F and Elizabeth Pitzler, of Tacoma, Wash., are visiting here with the Messrs Pitzler, their brothers. Both of them were former residents of this district.

The general opinion here is that the crops never looked better than they it does this season, altho the growth is slow.

GLYCERIN MIX REMOVES CAUSE OF STOMACH GAS

Simple glycerin, buckthorn bark, saline, etc., as mixed in Adlerika, acts on BOTH upper and lower bowels, removing poisons you never thought were there and which caused gas and other stomach trouble. Just ONE spoonful relieves GAS, sour stomach, sick headache and constipation. Don't take medicine which cleans only PART of bowels, but let Adlerika give you a REAL cleaning and see how good you feel! It will surprise you! J. F. CLARKE, Druggist.

RESTAURANTS ON WHEELS

Strange as it may seem, good housekeeping is one of the prime essentials of modern railroading. Mr. Traveller has become so used to strolling through the train to the dining car, for his needs in the way of food for himself, as well as for Mrs. Traveller and all the little Travellers, that he hardly gives a thought to how he gets a first class hotel meal, while whirling along at 60 miles an hour. The answer lies with about 1,200 highly trained employees of the Canadian Pacific Railway, serving in some 150 dining and cafe cars, from Atlantic to Pacific, and with an organization in stores and farms throughout the country, which places high class foodstuffs in the cafe's cupboards and refrigerators. The average number of meals served in a year is approximately 2,000,000. As to quantities, suffice it to say that these include nearly 1,000,000 lbs. of various meats; 1,000,000 lbs. of tea and coffee and some 400,000 quarts of milk and cream. The Pictures show meals being served in a typical C.P.R. diner and types of the staff of chefs and waiters employed in the service.

Church Services.

Services in St. Philip's Church next Sunday, 10.00 a.m.—United Church service every Sunday Evg. at 7.30.

On Sunday, July 19, English Lutheran services at St. Matthew Schoolhouse at 7.30 p.m., by Rev. H. Kuring.

Not Listening, Watching.

"The world is not listening to what you are saying. It is watching what you are doing."—Henry Wise Wood.

Hey! Someone Page the Corporal.

Much rain, more mud and lots of moonshine, were the three outstanding features of Dominion day celebration here.—Athabasca Echo.

Kept Right On Acomin'.

The Consort Enterprise has just rounded out 19 years. In retrospect Editor de Wolfe writes: "Good times have come and gone; hard times have come and kept right on coming!"

A Rare Find.

Miss Margaret Wilson has been much concerned over the state of her health recently. Upon consulting her oculist, a grave situation was revealed. Instead of having pupils in her eyes, he found a cowboy.—Union News.

Practice Makes Perfect.

Vermilion Standard: A strong man, having bent bars of iron, twisted horseshoes, and torn up packs of playing cards, as a final item takes a lemon from his pocket, squeezes it hard, and offers a prize to anyone in the audience who can extract one further drop. Several large and powerful men volunteered for the effort, and struggled unsuccessfully with the fruit. Finally a little man of weak and unimpressive appearance goes up to the stage, seizes the lemon, and to everyone's surprise, extracts quite easily, several good-sized drops. The performer, handing him over the prize, asks for an explanation of the seemingly impossible feat. "It is quite simple," replies the little man. "You see, I am Editor of the Vermilion Standard."
